Introduction

The Centers for Medicare & Medicaid Services (CMS) Care Compare website provides a single user-friendly interface that consumers can use to understand information about doctors, hospitals, long-term care hospitals, and other health care services instead of searching through multiple tools. Care Compare enables patients and caregivers to make informed decisions about healthcare based on cost, quality of care, volume of services, and other data. Information about the quality measures on Care Compare are presented similarly and clearly across all provider types and care settings. Consumers can select multiple facilities and compare their performance on various quality metrics. To access the Care Compare website, please visit <https://www.medicare.gov/care-compare/>.

This document provides information about the Long-Term Care Hospital (LTCH) Quality Reporting Program (QRP) data on Care Compare. Care Compare provides data on over 350 LTCHs. More information about the LTCH QRP measures displayed on Care Compare can be found by visiting the LTCH QRP Information Page at: <https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/LTCH-Quality-Reporting/LTCH-Quality-Reporting-Measures-Information>.

Care Compare information about LTCHs is typically updated or refreshed quarterly in March, June, September, and December; however, the refresh schedule is subject to change and not all measure data will be updated during each quarterly release. See Appendix A: Care Compare Anticipated LTCH Refreshes and Data Collection Timeframes for the full list of LTCH measures contained in the downloadable data found on the Provider Data Catalog website, along with information about reporting cycles for each measure.

Links to download the data from the zipped comma-separated value (CSV) flat file formats can be found on the Provider Data Catalog website. When archived data becomes available, it will also be provided in the Provider Data Catalog. To access the Provider Data Catalog, please visit: <https://data.cms.gov/provider-data/>.

Care Compare and the Provider Data Catalog are publicly accessible websites. As works of the U.S. government, the data on these websites are in the public domain and permission is not required to reuse them. An attribution to the Centers for Medicare and Medicaid Services as the source is appreciated. Table 2: File Summary

The list below shows the titles of all CSV flat file names included in the downloadable databases. The CSV column names and file names mirror the datasets found on <https://data.cms.gov/provider-data/>.

CSV Flat Files Note: Opening CSV files in Excel will remove leading zeroes from data fields that may include leading zeroes (e.g., provider numbers).

Users can follow these instructions to add back the leading zeroes. First, after you download a dataset from the Provider Data Catalog, open a new spreadsheet in Excel. Next, on the excel navigation pane, click **Data > From Text**. Within the “Import Text File” window, locate the file you downloaded from PDC and click **Import**. When the “Text Import Wizard – Step 1 of 3” window opens, select **Delimited > Next**. For “Step 2 of 3,” deselect **Tab** and select **Comma > Next**. For “Step 3 of 3,” select **Text > Finish**. Finally, when “Import Data” window appears, click **OK**. After completing these steps, you should be able to see leading zeros within the dataset.

¹Note: For Q1 2020 and Q2 2020, providers were exempted from data submissions due to the COVID-19 public health emergency (PHE). For this reason, CMS held the data constant (i.e., froze the data on Care Compare and the Provider Data Catalog) following the December 2020 refresh. LTCH data refreshes resume on Care Compare and the Provider Data Catalog starting with the December 2021 refresh for assessment-based measures and CDC/NHSN measures. Following the data freeze, the data reported on Care Compare will use fewer than the expected quarters of data for assessment-based and claims-based measures and will exclude Q1 and Q2 2020 data for all measures. Additional information on the COVID-19 Affected Reporting is available in the LTCH QRP LTCH QRP Section of the FY 2022 IPPS/LTCH PPS Final Rule. (<https://www.govinfo.gov/content/pkg/FR-2021-08-13/pdf/2021-16519.pdf>).

*Normal public reporting resumes with expected quarters of data.

** CMS has decided to continue with the data freeze for claims-based measures for an additional six months. This decision will allow

CMS more time to analyze the calculation of these measures, given the required comprehensive exclusion of claims data that occurred during Q1 2020 and Q2 2020, and the effect of that missing data on such aspects of measure calculation as lookback periods, and risk adjustment. CMS is targeting the June 2022 refresh of Care Compare for the resumption of claims-based measure updates on Care Compare.
